```java
import java.util.Scanner;
public class Tema.java {
   public static void main(String[]args) {
          Scanner tastatura=new Scanner(System.in);
          int ore = scanner.nextInt();
          int minute=scanner.nextInt();
          tastatura.close();
          int durata=ore * 60 + minute;
System.out.println("Durata:"+ durata);
   }
}
```

```java
import java.util.Scanner;
public class Tema.java {
public static void main(String[]args) {
      Scanner tastatura=new Scanner(System.in);
      int a=scanner.nextInt();
                  int b=scanner.nextInt();
                  tastatura.close();
                  double c = Math.sqrt((a*a)+(b*b));
                  System.out.println("c="+c);
   }
}
import java.util.Scanner;
public class Tema.java {
      public static void main(String[]args) {
        Scanner tastatura=new Scanner(System.in);
        double  p = scanner.nextDouble();
        double m=scanner.nextDouble();
        tastatura.close();
        double cantitate = 100 *m/ (100-p);
        System.out.println("Cantitatea necesara:"+ cantitate);
   }
}
```
